

October 30, 2019

Dear Grand Board Of County Commissioners:

Marijuana has been legal since 2012 in the state of Colorado. For the past 7 years now Colorado has successfully proven that it can work & has done so by running dispensaries throughout the state without incident, profitably & to the benefit of the people of the state & the US. Don't let Grand County be seen as one of the counties that fell behind the times that succumbed to the pressure of religious zealots & lost out on making money off of a new business that for seven years now has worked in this state. Grand county is not the most 'well off' state in the county & could surely use the influx of capital into the county treasury.

Thank you for your consideration into this matter.

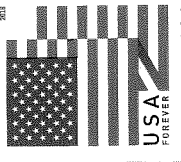

Glenn H. Frederiksen
