Sulphur Gulch Reservoir	Colorado River	12/10/1999	10/8/2007	16,000 AF <sup>C</sup>	99CW279

**NOTE: The information contained in this table is for descriptive purposes only, and is not intended to represent an interpretation, admission or modification of any of the water right decrees.**

A. Reuse of return flows generated by diversion and importation through the Moffat and Jones Pass Tunnels of this water right are subject to the ruling in Case No. 81CW405, Water Division No. I. If the agreement or ruling is modified such that Denver Water is able to reuse these return flows, such return flows shall be subject to Articles I and II.

B. Pending claim in Case No. 2007CW031 to make 245 cfs absolute. Only existing portion of Williams Fork Diversion Project, which includes Bobtail, Steelman, McQueary and Jones Creeks, is included in Attachment A. Conditional water rights associated with the enlargement and extension of the Williams Fork Diversion Project is not limited to use within the Service Area, but is subject to Article I.C.3.

C. Water right is conditional for the amount shown and exceeds Denver Water's existing ability to divert.

D. Water right is partially conditional and partially absolute.

E. Application to make 260 cfs absolute pending in Case No. 2008CW290

F. Pending application in Case No. 2008CW159 to make 672 of the 3,000 cfs absolute.

G. Applies to only that portion of the water right not needed to satisfy existing obligations under Articles I.A and I.B. This water right shall not be used to displace capacity that can be used to meet existing obligations under Articles I.A and I.B.

H. The City Ditch and High Line Canal are both currently used to meet demands outside the Service Area. Should the use of these rights ever be changed, they will be used in the same way as water rights on Attachment A.

I. This water right will only be developed cooperatively with West Slope Entities pursuant to Articles I C.3 and III.E.19.
