Subject: Support for MMK Limited

Dear Commissioners,

I would like to express my full support for the licensure of MMK Limited at 10863 US HWY 34.

As seen in comments in opposition against the licensure of a retail marijuana license to MMK Limited, there are concerns around marijuana specifically and how this product can potentially effect the community in a negative way. I am compassionate, respectful, and understanding of those concerns and feel that there is something that can be done to protect, prevent, and avoid those concerns from becoming more of a reality than they already are with in our community. Residents and tourists alike who use marijuana and marijuana products currently posses, use, and bring these products into our community from an illegal source, or from an outside retail vendor.

Marijuana has been present in large amounts in the Grand Lake community for over 50 years. Currently, individual residents and tourists alike that use the product, obtain this product in one of two ways. One, from an illegal source, that is not monitored, controlled, regulated, and is capable of dispensing this product to minors and youth. These illegal sources of product procurement do not contribute to the community in any positive way via revenue contribution, positive community contribution and education. Second, residents and tourists alike that use the product have access to the product, either illegally or from a retail entity that does not contribute, or care about the Grand Lake community. These outside retail entities do not educate their customers on the particular values, rules, and expectations of the Grand Lake community in order to protect the health safety and welfare of the Grand Lake Community, as these vendors are not a part of the community and simply do not care how their product effects Grand Lake specifically.

All concerns addressed by constituents, are very current and real problems already occurring in our community, going unchecked, uncontrolled, un monitored, and there are currently zero preventative measures put in place to protect those concerns of constituents to benefit the health safety and welfare of the community.

If Licensure is granted to MMK Limited in The Grand Lake Community, the owners and business alike will be in charge and held accountable and responsible to protect, and contribute to positive measures contributing to the health, safety and welfare of our community. Where as, if licensure is denied, there will be no responsible entity to protect these concerns of the community that already exist, and the over all health safety and welfare of the community will be further, negatively impacted as ways described by constituents, as all marijuana users in the community will still have access to marijuana in a non contributing and a non educated fashion.

MMK Limited is and has taken many lengths and measures to protect these concerns and the health, safety, and welfare of the community. MMK Limited is contributing to the health of the community through positive education of every customer about the rules, wares, and expectations of the community, as well as working with the Marijuana Education Initiative to implement educational curriculum into the East grand School District to help contribute to the health and safety of our youth. Also, MMK Limited is developing a medical care facility in the town of Grand Lake to contribute to the over all health of the community. MMK Limited is protecting the safety of the community by educating every customer about the rules, regulations and expectations of the community, and with out these efforts, all marijuana users will be ignorant to the concerns of the community, leaving those concerns un protected fully, as it currently stands today. there will not be an increase in marijuana related incident if licensure is gained, as all individual residents and tourists alike have access to the product post prohibition and already bring in and posses marijuana in our
