Subject: Marijuana laws

Thank you for the opportunity to comment on the proposed marijuana store in Winter Park. As an owner and frequent visitor, I must say that I am disturbed by the proliferation of these stores in Colorado. The propaganda may be that it is for medicinal purposes but everyone who thinks clearly knows that medicinal use is a very small percentage of the business.

More and more people in Colorado are using more and more marijuana. So, now let's mix it with high altitude, mountain driving and biking, and ski slopes! Does that make sense to anyone? Do what Kansas has done and add people who can carry guns anywhere and you have the perfect Molotov cocktail! Boom!!

Don't we have enough danger with terrorists? Why numb many of our own citizens so they can't react quickly or think clearly?

Clearly, I am opposed to allowing this store to open in Winter Park. However, I will be stunned if it is stopped.
